PROFILE

I have five years of computer academic education. And want to become successful web developer because coding is my hobby. I am learner and want to learn all my whole life. Please sir/madam kindly give me a chance to become a developer so that i can prove myself . Coder with excellent typing skills.

PROJECTS

React, Bootstrap, Tailwind, vite, Html, Css, Nextjs

- 1.Textutils-In this project i learned UseState Hooks, function based component, routing , changing theme(darkmode, color palete), all the logics(i.e Uppercase into Lowercase,Copy text, Remove Extra Spaces etc)(Javascript,React,Bootstrap,Html)
- 2.NewsWebApp- Several features i have added to it e.g design navbar,themes, color palete, time, calender, hover alerts etc. In this project i learned to fetch api using class based and function based components both. Learned component Did Mount, React life Cycle, Constructor-super(), Hooks, Adding Spinner in all the phases where used, Scrolling page using next and previous click but also infinite scroll. This Project is Really Amazing. (Javascript,React,Bootstrap,Html)
- 3.NetflixClone- I learned here in this project to include slider in react js and using firebase for back end.
- (Vite(React) Tailwind css, Javascript,Html)
- 4.PortFolio- With the use of React and Tailwind . In this project i learned and used Tailwind and amazing power of tailwind css. Learned Array destructring, Smoothscrolling, using useState Hook i implemented type animation and added color to it, Darkmode Theme alerts while submitting contact form. Hover on navBar many more. etc.(React, Javascript, Html , Tailwindcss)
- 5.Nextjs, MongoDb I have Learned Mongodb, Nextjs, and also learned and made a project in Nextjs.
